# Immigrant Demographics Richmond, BC

About the NewToBC Immigrant Demographic Profiles

**NewToBC** is pleased to share this 3rd edition of its **Immigrant Demographic Profiles**; the first edition was developed in 2013 and the second in 2018. Using Census 2021 data, profiles have been created for the 14 Greater Vancouver / Fraser Valley communities that received the greatest number of new immigrants over the last census period (2016 – 2021).

The profiles include useful data on countries of origin, languages spoken, age at immigration, education levels, employment, income, religion, and more. Library staff and community service providers have found these profiles invaluable for service planning and funding proposals. Immigrants, the business community and others have found the information useful in understanding their communities and their newest residents.

To learn more about **NewToBC** and its work and for a glossary of terms, see the back page.

## About the City of Richmond

Richmond is comprised of a series of islands nested in the mouth of the Fraser River with the coastal mountain range as a backdrop. It is bordered by Vancouver and Burnaby to the north, New Westminster to the east, and Delta to the south. The Strait of Georgia forms the city's western border.

The Richmond Public Library has four branches and a Saturday services location.

### Land Acknowledgement

NewToBC acknowledges that Richmond is located on the ancestral territory of the hańdamińam speaking peoples.

In 2021, Canada welcomed a record number of immigrants – 406,000. Immigrants made up 23% of Canada's total population, also a new high. Nearly 70,000 chose B.C. in 2021; this marked the secondhighest level of international immigration to B.C. on record.

100% sample data for total population and 25% sample data for immigration status (Census 2021)

- The number of immigrants settling in B.C. almost doubled between 2016 and 2021; 38,085 arrived in 2016 and 69,470 in 2021.
- In Census 2021 British Columbia's 1.42 million immigrants represented 17% of the national total. Only Ontario, with 4.2 million, had more.
- > 29% of all British Columbians were born outside of Canada, similar to Ontario's 30% and notably higher than the national level of 23%.
- During the census period, B.C. welcomed 14.9% of Canada's recent immigrants; Ontario welcomed 44%.
- NOTE: Census 2021 encompasses a portion of the Covid period, when immigration levels were low, and does not capture the strong post-Covid increase.

## **Immigration to British Columbia**

These were the 20 B.C. municipalities attracting the largest numbers of immigrants during the Census period – 2016 to 2021.

In Census 2021, 76.4% of all B.C.'s immigrants and 78.4% of recent immigrants resided in Greater Vancouver.

Recent immigrants accounted for more than 80% of total population growth in Greater Vancouver.

20 communities in B.C. that received the most immigrants over the last census period (2016 - 2021)

2 | Immigrant Demographics | City of Richmond | www.NewToBC.ca

In 2021, Richmond was the 4th largest recipient of recent immigrants to B.C.

Between 2016 and 2021, Richmond welcomed 13.705 recent immigrants, while its net immigrant population increased by only 7,295. This suggests a significant number of established immigrants moved out the City during the census period.

### Immigration to the City of Richmond

Immigrants constitute three-fifths of the city's population, but immigrant population growth has slowed significantly.

In recent decades Richmond has experienced rapid population growth with a notable contribution from immigration. Between 2001 and 2021, the immigrant population rose by 37,300, accounting for 85% of the total increase.

The city has consistently maintained a larger share of immigrants than in Greater Vancouver and almost all other Canadian munipalities in 2021.

## **Immigrants by Age Group**

### Census data illustrates the emphasis placed on those of core working age within Canada's immigration system.

- Immigration is a key economic solution to Canada's aging population. In 2021, the average age of Richmond's recent immigrants was 35, significantly lower than the total immigrant population (51.1), but slightly higher than the Canadianborn (31.6).
- In 2021, the core working-age group (25-54 years) constituted 67% of Richmond's recent immigrants, substantially more than the 47% of its total immigrant

population and the 29% of its Canadian-born population. These figures underscore the vital role of immigration in supplying skilled and young workers to Canada's labor market.

Immigrant Arrivals by Period of Immigration (Census 2021)

Richmond

#

%

- At 92%, the proportion of Richmond immigrants identifying as racialized is only slightly higher than in Greater Vancouver.
- decades past.

Population and Immigration Trends: (2001 - 2021)

### **Period of Arrival**

A large proportion of Richmond's immigrants arrived in the 1990s and 2000s.

- Census 2021 shows that recent immigrants comprised 11% of Richmond's immigrant population, less than the Greater Vancouver level of 14%. By comparison, 55% arrived between 2011, versus 47% in Greater Vancouver.
- 22% of Richmond's immigrants had lived for less than ten years, compared to 26% Greater Vancouver region.
- Compared to the previous census period, received 10% fewer recent immigrants, wh Greater Vancouver region had 9% more.

Recent immigration policies have effectively responded to Canada's aging population, as only 7% of recent immigrants in Richmond were aged 65 or over. This proportion is notably lower than the 25% among all immigrants and the 12% among the Canadian-born.

Richmond's Canadian-born population has a significantly higher proportion (31%) of young people aged 14 and under, in part a function of the city's role as a favourite landing place for young adult immigrants in the 1990s and 2000s.

Immigration is playing a significant role in addressing Canada's low birth rate and its aging population.

▶ However, 57% of the Canadianborn population identifies as racialized, compared to 31% region-wide. This is reflective of Richmond's role as a magnet for racialized immigrants in

The percentage of the total immigrant population identifying as racialized is higher in Richmond (92%) than Greater Vancouver (80%).

## **Countries of Origin**

#### China remains the predominant source, but otherwise the balance is shifting.

- As in Greater Vancouver and B.C., China, India and the Philippines are the top three sources of recent immigrants, but in Richmond, China accounts for an outsized proportion, fully 52% compared to 19% in Greater Vancouver.
- Among all immigrants, Hong Kong ranks second with a 19% share, partly due to an influx during the 1980s and 1990s, a period when arrivals from Taiwan were also strong. Although reduced in importance, both countries continue to account for a significant share of recent

immigrants in Richmond, which is not the case for Greater Vancouver.

▶ The Philippines occupies a role similar to elsewhere in Greater Vancouver, but arrivals from India are lighter, amounting to only onethird of the regional proportion.

**Immigration Arrival Categories** 

### More than two-thirds of all immigrants arrived in the economic class, but among recent immigrants a relatively high proportion was sponsored by family.

▶ 69% of Richmond residents arrived in the economic-class, a significantly higher proportion than Greater Vancouver's 60%. However, at only 59%, recent immigrants are slightly less likely to be economicclass arrivals than in the region.

Top 10 Places of Birth, by Total and Recent Immigrant Populations (Census 2021)

The difference is largely accounted for by a relatively high proportion of family-class arrivals, at 37% in Richmond compared to 28% for the region. This is perhaps a reflection of Richmond's relatively early emergence as a magnet for immigrants, especially from Chinese-speaking countries.

At just 4% of both immigrants and recent immigrants, the proportion of refugees is only half that of the region overall.

#### Greater Vancouver

\*Note: 'Other immigrant' refers to a person who was granted permanent resident status under a public policy or humanitarian and compassionate cases.

China, the Philippines and India were the top three source countries for recent immigrants to the City of Richmond.

### Languages Spoken

Mandarin and Cantonese continue to dominate, but an increasing proportion of recent immigrants speak English at home.

- The proportion of recent immigrants who often spoke nonofficial languages at home dropped from 74% in 2016 to 69% in 2021. This suggests that Richmond has welcomed more recent immigrants with official language skills.
- Chinese (including Mandarin and Cantonese) remained the most common home language for recent immigrants. In 2021, 50% spoke Chinese at home, the same proportion as in the total immigrant population, but a decrease from the 55% share in 2016.
- Mandarin also ranked as the leading home language for recent immigrants in the Greater Vancouver region at 14%, but in Richmond, the language was spoken at home by 40% of recent immigrants and 23% of the total immigrant population.

- Fully 52% of Richmond immigrants report no religious affiliation, while among recent immigrants the proportion has increased to 60%. That number is significantly higher than the 38% reported by new immigrants in Greater Vancouver but in the same range reported by the Canadian born.
- In 2021, nearly a quarter of recent immigrants (23%) in Richmond identified as Christian, compared to 30% in Greater Vancouver.
- ▶ 6% of new immigrants to Richmond identify as Muslim compared to the 10% reported in the region overall.

## **Education Levels**

Immigrants are highly educated, with recent immigrants the most educated of all.

- In 2021, recent immigrants in Richmond demonstrated a high level of educational attainment, with 59.4% holding a bachelor's degree or higher. This figure was 12% higher than the proportion among all immigrants and 23% higher than Canadian-born residents. However, the number was slightly lower than the corresponding figure for recent immigrants in Greater Vancouver (63.4%).
- Compared to the previous census period, Richmond saw its proportion of college and university-educated immigrants grow significantly. In 2016, the percentages of those with a bachelor's degree or higher were: 50.6% for Richmond's recent immigrants, 43.2% for its total immigrants and 35.5% for its Canadian-born population.

### Labour Force Participation

Recent immigrants had the highest participation rate of Richmond residents, but all categories trailed the regional average.

- In Census 2021, immigrants and recent immigrants accounted for 65% and 8% of Richmond's labor force respectively, similar to the rates in Census 2016.
- 12.1% of Richmond's recent immigrants were unemployed, slightly higher than for the total immigrant labour force (11.2%) and the Canadian-born labour force (9.9%), and higher than the regional level. Overall, Richmond residents of all types displayed a lower participation rate than did the region.
- The Covid-19 pandemic resulted in a significant temporary increase in the unemployment rate for Richmond's labor force, regardless of immigration status, compared to Census 2016.

	Richmond			Greater Vancouver		
	Canadian Born	Total Immigrants	Recent Immigrants	Canadian Born	Total Immigrants	Recent Immigrants

### Income

The income of immigrants has risen significantly but still lags that of non-immigrants.

### **Total Income**

- Census 2021 revealed a significant increase in income for Census 2021 showed a positive employment outcome for all groups in Richmond. Particularly, recent immigrants recent Richmond immigrants. This proportion of full-time, experienced a substantial rise, with their median income year-round recent immigrant workers increased from 16% doubling from \$15,834 in 2015 to \$31,600 in 2020. in 2015 to 28% in 2020.
- Despite the increase, recent immigrants in Richmond still earned 4% less than the median income among all immigrants and 25% less than their Canadian-born counterparts.
- Overall, Richmond residents earned less than their counterparts in Greater Vancouver.

The professional, scientific and technical services sector is the second largest industry for Richmond's larbor force. It shows a slightly higher representation among immigrants (11%) and recent immigrants (12%) compared to the Canadian-born population (10%).

The health care and social assistance industry is more prominent among the Canadianborn population, with 11% working in this sector. It shows slightly lower representation among immigrants (10%) and among recent immigrants (7%).

#### North American Industry Classification System (NAICS)

### **Employment Income**

The median employment income of recent immigrants who worked full-time and year-round was \$49,600 in 2020, reflecting a 34% increase from 2015.

(continued on page 12)

#### (continued from page 11: Income)

However, despite the progress, the median income of recent immigrants working full time was 17% less than that of all immigrants and 28% less than the Canadianborn. Nevertheless, the income gaps between recent immigrants and other groups have narrowed since 2015.

#### Low Income

Census 2021 data reveals that immigrants in Richmond continue to face high rates of low income. In 2020, 22.5% of recent immigrants and 18% of the overall immigrant population aged 15 years and over were classified as low-income, significantly higher than the 8.9% among the Canadian-born.

### **Glossary of Terms**

**Census** refers to the population Census of Canada, which is taken at five-year intervals and counts persons and households and a wide variety of characteristics to provide a statistical portrait of the country.

**Total Population** refers to the total population counts in private households of a specific geographic area, regardless of immigration status on Census Day.

**Canadian-born** refers to a person who was born in Canada. The Canadian-born population also includes a small number of persons born outside Canada who are Canadian citizens by birth.

Immigrant refers to a person who is or has ever been a landed immigrant or permanent resident. Such a person has been granted the right to live in Canada permanently by immigration authorities. In the 2021 Census of Population, 'Immigrant' includes immigrants who were admitted to Canada on or before May 1, 2021. **Recent immigrant** refers to a person who obtained landed immigrant or permanent resident status in the five years preceding a given census. In Census 2021, this refers to the period from January 1, 2016, to May 11, 2021.

**Greater Vancouver** is a regional district (Census Division) often known as Metro Vancouver. It is comprised of 21 municipalities, one electoral district and one First Nation (Tsawwassen). It borders the Strait of Georgia to the west, the U.S. border to the south, Abbotsford, and Mission to the east, and unincorporated mountainous areas to the north.
